

JWL Sodablasting Set

Clean or remove without damaging

Sodablasting is a fast and gentle method of removing paint and corrosion - even from hard to reach places. Sodablasting neither warms up, nor stretches the sheet metal. Sodablasting does not damage glass, rubber or plastic and due to this fact, sodablasting requires a minimal need for shielding. Sodablasting protects the bare metal from rusting right away in contrast to sandblasting.

Sodablasting removes anti-fouling paint from boat without damaging the hull. Sodablasting removes varnish and doesn't damage seals (rubber or plastic).

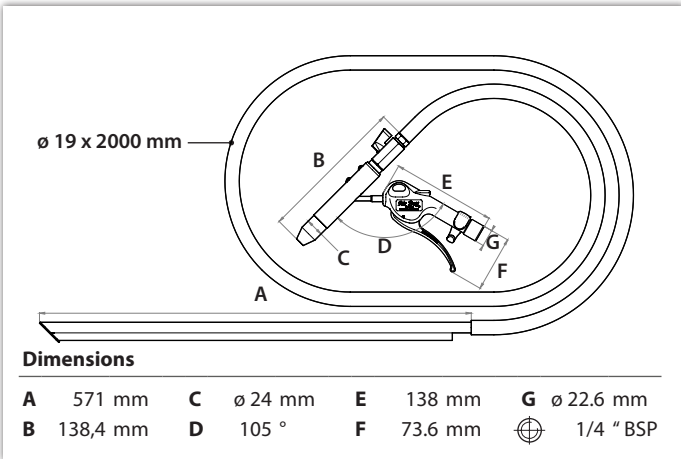

Sodablasting cleans paint off glass surfaces or window frames without damaging the glass or rubber seals. Sodablasting removes varnish from wooden furniture. Sodablasting is gentle and environmentally friendly.

JWL Sodablasting Set enables you to adjust the airflow and soda flow independently. JWL Sodablasting Set is suitable for hobby as well as professional use!

JWL Sodablasting Set uses soda specifically intended for blasting.

Always use P2 respiratory protection, hearing protection and eye- and facemask when blasting with soda. Blasting soda is pure NaHCO₃, i.e. normal baking soda. It is not dangerous, but may be harmful if inhaled as dust.

NB! requires a compressor with a capacity of at least 5.5 HP / 450 l/min.

Materials		Specifications		Accessories		Code no.	
Handle and trigger	Acetal plastic	P	6 - 12 Bar (87 - 174 psi)	Safety goggles and mask		145108	
Valve	Acetal plastic		minimum 450 l/min	Hardened steel nozzle with o-ring		145803	
Gaskets / O-rings	Nitrile		~1,16 kg				
Nozzle	Hardened steel						
Spring	Hardened spring wire
